Does White Supremacy Still Exist?

Gerald J. Kubicki's Novel, "A Dubious Terrain," Uses Fiction to Address an Important Issue

As race relations rock the headlines, Americans are beginning to question whether or not white supremacy still exists. Gerald J. Kubicki's thrilling page-turner, *A Dubious Terrain*, the fourth installment in the Dubious Mystery series offers some fictional insight into this very real problem.

In Kubicki's novel, a fictional white supremacist organization known as the Effort is started by the German Nazis in the early 1930's and then spends decades infiltrating American society. They are sent to study at Harvard University with the goal of developing contacts with the rich and powerful in America.

The long-term goal is well-plotted and methodically executed; "The planners believed that Germany was too small to dominate the world, but America, with all its resources, could become the eventual head of the Third Reich." The members of the Effort hold dominant positions in the media, entertainment industry, manufacturing, weapons and ammunition industry, and one member of the Effort has recently ascended into a powerful position as the Director of Homeland Security, making it "the muscle behind the movement."

Although Kubicki's book is fictional, he asks his readers, "Who knows if this didn't really happen?" Kubicki offers more than just a riveting plot, he interweaves relevant, timely themes that resonate with audiences, tackling a variety of issues that range from illegal immigrants to political corruption to the power of Homeland Security. Readers will inevitably be left anxious for the next two installments in the Dubious Mystery series: *A Dubious Plan* and *A Dubious Artifact*.

Gerald J. Kubicki

Gerald J. Kubicki considers himself “an average guy who can write.” He was born and raised on Eastern Long Island in the Westhampton area, attended college at SUNY Plattsburgh, and moved to New York City, where he was hired by a major manufacturer of food products that trained him how to be an executive, to believe that anything is possible, and exposed him to the broader world. As an executive, consultant, and founder of an English language school in China, Kubicki traveled all over the world, which is reflected in his books.

He currently lives in Las Vegas, the setting of *A Dubious Terrain*. Although Kubicki did not start writing until late in life, he is already a prolific author; he writes a new novel every three months, spending one month researching, one month writing, and one month golfing before starting the next novel.

The Dubious Mystery Series

The Dubious Mystery Series centers on protagonist Colton Banyon, an “average guy” who loves history, has a weakness for beautiful women, and is good at solving mysteries. Readers were first introduced to Banyon in *A Dubious Mission*; he has returned for three more mystery adventures: *A Dubious Secret*, *A Dubious Dream*, and *A Dubious Terrain*.
