
Making Health Care Affordable Equals the Creation of Millions of American Jobs and the Reduction of Our National Debt

A Centrist, Non-Partisan Solution

Americans are spending almost \$3 trillion on healthcare costs annually, accounting for 20% of our current GDP, a percentage that is projected to grow to 30% of our GDP by 2019. Both health insurance companies and doctors claim that they are only making a small percentage of healthcare expenditures, leading Americans to the \$3 trillion dollar question: where is that big river of money going?

With only 1% of Americans working in the healthcare industry and staking their claim on 20% of our GDP, it is clear that there is no time to waste in answering this question. In his book, *The Win-Win Solution*, best-selling author, entrepreneur, and CNN guest, Bill Sidhu addresses this problem and purposes a non-partisan solution that can put as much as \$5,000 per year back in individuals' pockets, or as much as \$10,000 per year back in a families' pockets, create millions of jobs, eliminate the national debt, and resuscitate our economy, create jobs and cure the sick health care system. once and for all.

Unlike a social welfare plan like Obamacare, which was just ratified into existence by the Supreme Court, Sidhu instead proposes a plan that stresses individual choice, backed by legislative support. His plan, the American Prosperity Plan, relies on **free market** forces to push the cost of health care down while improving the quality of care provided.

Sidhu's plan is detailed, sound, and non-partisan. His book, *The Win-Win Solution* outlines the epic problems that the nation is facing as a result of a healthcare industry that is more sick than its patients,

the details of his plan, and the tremendous benefits that it would hold for America, if adopted. With Sidhu's plan gaining attention from both sides of Congress, Americans can begin to hope for a brighter future for their health, their finances, and their nation.

Bill Sidhu

Bill Sidhu came to America with \$7 in his pocket, working his way up to become enormously successful as a pioneer of secured credit cards, his company becoming the second largest issuer in America. Sidhu then went on to guide a series of successful entrepreneurial ventures, adding to his track record of success.

Now, Sidhu has turned his attention to doing his part to help “fix” the nation that he feels has given him so much. And in his mind, the key is the broken health care system: particularly its inefficiencies and ridiculous costs. By fixing health care, he proves, we will also fix our economy, while creating millions of jobs!

Sidhu’s “American Prosperity Plan” is now catching the eyes and ears of people on both sides of the aisle in Congress. It’s not a Republican plan; it’s not a Democratic plan. It’s a plan *everyone* can agree with, and very easy to implement. The book even explains how right now, without Congress adopting any changes at all, you can put \$5,000 in your pocket each and every year!
