

# Fix the US Economy and Create Millions of Jobs, Just by Making Health Care Affordable

*Best-Selling Author and Successful Entrepreneur, Bill Sidhu, Says “Yes, We Can”!*

Healthcare has become a hot topic and, while Republicans and fiscally conservative politicians and citizens have all expressed their distaste for Obamacare, no one has proposed an alternate plan to replace it. Expert and best-selling author of *The Win-Win Solution* and CNN guest, Bill Sidhu, has proposed a non-partisan, centrist plan that everyone can agree on, fixing not only the nation’s current healthcare, which is more sick than its patients are, but also breathe life back into our economy, putting thousands of dollars back into Americans’ pockets each year, creating millions of jobs, and reversing our out-of-control debt.

The national benefits of adopting this plan are immense. By freeing hundreds of billions of dollars, the “win-win solution” will:

- Create millions of jobs by spurring consumer demand for goods and services.

- Reduce our long-term national debt and deficit at an accelerated pace, which will stop us from contributing to the burgeoning national debt.
- Cut the healthcare costs to make it affordable for millions of more people to come out of tax payer funded programs like Medicare and Medicaid, further reducing our debt.

The benefits to individuals of adopting this plan include:

- The possibility of putting thousands of dollars back in the pockets of the consumer, all while keeping the same, if not better, healthcare coverage than they currently receive.
- The creation of a “Healthy Life Fund” that will act like a health care retirement fund, accumulating tax-free annually.
- Personal empowerment through a sense of control over one’s own health and life.
- Better health at a lower cost.

Sidhu and his plan are gaining attention from both sides of Congress. It is up to Americans to support his plan and help to build themselves a brighter, healthier, happier and more financially sound future!

**Bill Sidhu**

Bill Sidhu came to America with \$7 in his pocket, working his way up to become enormously successful as a pioneer of secured credit cards, his

company becoming the second largest issuer in America. Sidhu then went on to guide a series of successful entrepreneurial ventures, adding to his track record of success.

Now, Sidhu has turned his attention to doing his part to help “fix” the nation that he feels has given him so much. And in his mind, the key is the broken health care system: particularly its inefficiencies and ridiculous costs. By fixing health care, he proves, we will also fix our economy, while creating millions of jobs!

Sidhu’s “American Prosperity Plan” is now catching the eyes and ears of people on both sides of the aisle in Congress. It’s not a Republican plan; it’s not a Democratic plan. It’s a plan *everyone* can agree with, and very easy to implement. The book even explains how right now, without Congress adopting any changes at all, you can put \$5,000 in your pocket each and every year!
