

## A Functional and Versatile Android App for Cataloguing Collections

*App-Order.com's Free Android App, "Save Your Booty," Helps Its Users to Organize their Collections and File Insurance Claims*

Trying to keep up with and catalogue items in a collection can be a tedious and time-consuming process. With *App-Order.com's* free Android app, "Save Your Booty," collectors of all types can expedite the process.

To start inventorying collectibles, all that a collector has to do is scan the barcodes and take pictures of the items in their collection. "Save Your Booty" will collect and store the image, product information, retail value, and current value, organized by category or subset. The end result is a convenient, handheld catalogue with which collectors can access the items in their collection at any time, from anywhere. By having the information at the palm of the hand, collectors know exactly which items they already own when they are shopping for new additions to their collection.

The app has more than just organizational benefits: if an item in a collection is ever damaged or destroyed, "Save Your Booty" users have detailed descriptions of all of the items within their collection, making it easy to file a claim with renter's or homeowner's insurance companies. Wine collectors save themselves time and energy by eliminating the need to go to the wine cellar to search for a bottle, sports memorabilia collectors save themselves trips to their storage units or basements, and rare book collectors save themselves from rummaging through their libraries.

"Save Your Booty" is arguably the most functional, versatile, and beneficial Android app available to collectors. What's more, **it is completely free.**

## **App-Order.com**

*App-Order.com* lives up to their slogan, “We have an app for that!” They are the leader in efficiency and productivity apps. Their affordable and highly customizable apps reduce or eliminate data entry costs and improve and monitor quality control and staff efficiency, among other benefits.

They have developed apps for over 100 municipalities at no cost to the municipalities or their residents. The municipality apps facilitate communication between citizens and local government, helping them to identify graffiti and other problem areas, expediting the city’s ability to meet the needs of its citizens. Some of the apps that they have developed include: Mesa, Arizona; Santa Ana, California; and San Jose, California.
